PERSONAL DETAILS

Nationality: Indian

Visa Status: Requires sponsorship

Languages: English (Fluent)

TECHNICAL SKILLS

- Python, SQL, R, Java, C
- PostgreSQL, Database Management, Data Modeling, ERP Systems
- AWS, Machine Learning, Algorithm Design
- Power BI, Tableau, Microsoft Excel, Dashboard Development
- EDA, Statistics, Linear Algebra, Data Visualization, Analysis Skills
- Data Structures, Project Management, Continuous Improvement

CERTIFICATIONS

J.P. Morgan Quantitative Research

Job Simulation, Forage — July 2026

Tata Data Visualization

Job Simulation, Forage — June 2026

AVAILABILITY

- Open to relocation
- Available for video interviews
- Can join within a mutually agreed notice period

PROFESSIONAL SUMMARY

Detail-oriented Data Science and AI undergraduate at IIT Guwahati, seeking a Data Analyst, Database Administrator, or Data Engineer opportunity. Combines strong SQL and Python skills with database design, ETL, and dashboard-development experience to convert raw operational data into clear, decision-ready insight and predictive models. Comfortable working independently on cross-functional analytics projects and adapting quickly to new business domains and teams.

EDUCATION

Indian Institute of Technology Guwahati

B.Sc., Data Science and Artificial Intelligence — CGPA: 7.03

Guwahati, Assam, India

Sep 2024 – Present

- Built a foundation in Python, R, C, and Java for programming, data analysis, and problem solving
- Developed knowledge of Statistics, Linear Algebra, Statistical Inference, and Optimization for data-driven analysis
- Worked with SQL and relational databases, including database design, querying, and real-world datasets
- Studied Data Structures, Algorithms, AI, and Machine Learning fundamentals

St Xavier's School (CBSE) • Little Flower School (CISCE)

12th — 76.60% (2023) | 10th — 82.83% (2021)

Salempur, Uttar Pradesh

PROJECTS

EV Buyer Prediction

Python, Scikit-learn, Pandas

- Developed a Random Forest classification model to predict the probability of a customer purchasing an electric vehicle
- Performed data cleaning, exploratory analysis, categorical feature encoding, and feature preprocessing
- Used stratified train-validation splitting and 5-fold cross-validation to ensure reliable model evaluation
- Evaluated the model using ROC-AUC, achieving a 0.9353 mean cross-validation score, and prepared the final Kaggle submission

Superstore Sales Analysis

Python, Pandas, Matplotlib

- Cleaned and analyzed retail sales data to evaluate sales, profit, discount, and regional performance trends
- Identified profit leakage caused by excessive discounting, including products sold at discounts exceeding 50% that resulted in losses
- Recommended optimized discount strategies by region and category to improve profitability and business performance

CERTIFICATION HIGHLIGHTS

- J.P. Morgan Quantitative Research (Forage): analyzed a loan book to estimate default probability using dynamic programming on FICO scores
- Tata Data Visualization (Forage): built executive-ready visuals and prepared client-meeting questions for TCS senior leadership
