PROFESSIONAL SUMMARY

Third-year B.Sc. student in Data Science and Artificial Intelligence at IIT Guwahati with hands-on experience in Python, SQL, statistics, machine learning, data analysis, and data visualization. Experienced in cleaning and analyzing real-world datasets, building and evaluating predictive models, and communicating data-driven findings. Currently developing deeper skills in deep learning and applied machine learning.

EDUCATION

Indian Institute of Technology Guwahati | Guwahati, Assam
B.Sc. in Data Science and Artificial Intelligence | Sep 2024 – Present | CGPA: 7.03
St Xavier's School | Salempur, Uttar Pradesh
Class XII, CBSE | 2023 | 76.60%
Little Flower School | Salempur, Uttar Pradesh
Class X, CISCE (ICSE/ISC) | 2021 | 82.83%
Relevant coursework: Statistics, Linear Algebra, Statistical Inference, Optimization, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Databases

EXPERIENCE

GCI World | Data Science Scholar | Sep 2026 – Present

- Selected for the GCI World 2026 September Scholar Program focused on structured learning in data science.
- Participating in lectures, office hours, guided coursework, and a structured course roadmap covering data science concepts and practical development.
- Working through an intensive learning environment designed to strengthen analytical, technical, and problem-solving skills.

PROJECTS

TraceAtlas (In Progress) | *Python, FastAPI, SQLAlchemy, PostgreSQL, Next.js/React, TypeScript, Pandas, PyArrow, Docker*

- Developed CSV/Parquet profiling with schema snapshots, data-quality metrics, version history, and SHA-256 content hashes.
- Implemented dataset lineage graphs, downstream impact analysis, JWT authentication, workspace access checks, and audit events.

DataPrism | *Python, HTML/CSS/JavaScript, SQLite, openpyxl, Docker*

- Built a business analytics platform that imports CSV/XLSX data and produces interactive, filterable dashboards.
- Engineered data cleaning, deduplication, transformations, joins, and exports; surfaced sales, refund, order, product, and channel trends.

CERTIFICATIONS & SIMULATIONS

J.P. Morgan Quantitative Research Job Simulation — Forage | Jul 2026 – Present

- Completed a quantitative research simulation involving loan-book analysis and probability-of-default estimation.
- Used dynamic programming to convert FICO scores into categorical variables for default prediction.

Tata: Data Visualisation: Empowering Business with Effective Insights — Forage | Jun 2026 – Present

- Completed a data visualization simulation involving executive-focused analysis and communication.
- Prepared questions for client senior leadership and created visuals to support data-driven decision-making.

TECHNICAL SKILLS

Programming: Python, R, C, Java, SQL
Data Science & ML: Data Analysis, Statistics, Machine Learning, EDA, Data Mining, Data Modelling, Linear Algebra
Tools & Platforms: Pandas, Scikit-learn, Matplotlib, Power BI, Tableau, Microsoft Excel, PostgreSQL, Git, Linux
Other: Data Structures & Algorithms, Database Management, Dashboard Development, ERP Systems
Languages: English
