Professional summary

Third-year B.Sc. student in Data Science and Artificial Intelligence at IIT Guwahati with hands-on experience in Python, SQL, data analysis, statistics, and data visualization. Developed a strong foundation in databases, algorithms, machine learning, and statistical methods through coursework and practical projects. Seeking opportunities in Data Analytics, Business Analytics, and other data-driven roles.

Willing to relocate to: Riyadh

Personal details

Highest Career Level: No Experience / Student

Industry: Analytics, Banking & Finance, Education & Instruction, IT Operations & Helpdesk, Software Development

Education

Data Science and AI (B.Sc)

Indian Institute of Technology Guwahati | Guwahati, Assam

Full-time | September 2024 to Present

Scored: 7.03

- Built a foundation in Python, R, C, and Java for programming, data analysis, and problem solving.
- Developed knowledge of Statistics, Linear Algebra, Statistical Inference, and Optimization for data-driven analysis.
- Worked with SQL and relational databases, including database design, querying, and real-world datasets.
- Studied Data Structures, Algorithms, AI, and Machine Learning fundamentals.
- Gained experience with data cleaning, visualization, Data Mining, Linux, and Git through coursework and projects.

12th Pass

St Xavier's School | Salempur, Uttar Pradesh

CBSE | English medium

Passing year: 2023 | Scored: 76.60%

10th Pass

Little Flower School | Salempur, Uttar Pradesh

CISCE(ICSE/ISC) | English medium

Passing year: 2021 | Scored: 82.83%

Skills

Data analytics

Dashboard development

AWS

Java

Algorithm design

Communication skills

Continuous improvement

C Programming

Database management

Power BI

Data structures

PostgreSQL

Project management

EDA

Certifications and licences

J.P. Morgan's Quantitative Research

July 2026 to Present

I just completed J.P. Morgan's Quantitative Research Job Simulation on Forage. In the simulation I:

- Completed a simulation focused on quantitative research methods
- Analyzed a book of loans to estimate a customer's probability of default
- Used dynamic programming to convert FICO scores into categorical data to predict defaults

Tata : Data Visualisation : Empowering Business with Effective Insights

June 2026 to Present

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
- Prepared questions for a meeting with client senior leadership
- Created visuals for data analysis to help executives with effective decision making

Additional information

Projects

EV Buyer Prediction | Python, Scikit-learn, Pandas • Developed a Random Forest classification model to predict the probability of customers purchasing an electric vehicle.

- Performed data cleaning, exploratory analysis, categorical feature encoding, and feature preprocessing.
- Used stratified train-validation splitting and 5-fold cross-validation to ensure reliable model evaluation.
- Evaluated the model using ROC-AUC, achieving a 0.9353 mean cross-validation score.
- Generated probability-based predictions and prepared the final Kaggle submission..

Superstore Sales Analysis | Python, Pandas, Matplotlib • Cleaned and analyzed retail sales data to evaluate sales, profit, discount, and regional performance trends.

- Identified profit leakage caused by excessive discounting, including products sold at discounts exceeding 50% resulting in losses.
- Conducted category and region-wise analysis, recommending optimized discount strategies to improve profitability and business performance.
